

# Rock 'n' Roll and Radio

**A Listening Series at**

**The Museum of Television & Radio**

**June 3 – November 20, 1994**

To many people, contemporary radio is identified with music, especially rock 'n' roll music. This is not accidental. The unique relationship between the medium and the music began nearly fifty years ago.

This Museum listening series, presented in two six-month parts, offers a chance to hear actual radio segments, called airchecks, that capture both the music and deejay in time. Through these six segments, this series tells the story of rock 'n' roll and radio—the story of the music and the voices that the audience grew to know and identify with, the deejays.
